Subject: Microsoft Settlement

RE: the Tunney Act

For the sake of the public at large please be assured that this settlement is in the public interest and to continue more litigation against Microsoft will only hurt the American economy and benefit a few special interests. Please do NOT continue more litigation against Microsoft and continue to hurt the economy.

The attack on Microsoft has already done damage to the stock market. Just go back to when it emerged during the last administration and see the effect on the market every time a new announcement came out about punishing Microsoft. Its not Microsoft that gets punished its the American Public and Freedom that suffers.
